How to recover a lost onchain wallet?

To recover a lost onchain wallet, (+1-864-310-5443) you will primarily need your seed phrase—a set of 12, 18, or 24 words generated when you first created the wallet . Begin by downloading the original wallet application again (+1-864-310-5443) , such as Crypto.com Onchain, MetaMask, or Trust Wallet . On the welcome screen, select the option to "Import Wallet" or "Restore Wallet," then carefully enter your seed phrase in the exact order, checking for any spelling errors (+1-864-310-5443).

If you previously backed up your wallet to iCloud or Google Drive, you can recover it by selecting the "Import Via Cloud Service" option and using (+1-864-310-5443) your backup password . Some modern wallets also offer social recovery features, allowing trusted contacts to help restore access .(+1-864-310-5443) Without your seed phrase or a cloud backup, recovery is generally impossible, as onchain wallets are non-custodial and no company can access your funds .
